

ESPRIT ELECTRONICS LIMITED

CONFLICT MINERALS STATEMENT

Esprit does not manufacture the component products that it supplies and has no visibility into the country of origin of the raw material used in the fabrication of parts used to manufacture electronic parts supplied by its supply chain.

Esprit operates whenever possible within the recognised UK and European electronic distribution network. Many distributors do not have authority to disclose compliance due to the complex nature of the issue and therefore rely on manufacturer supplied information.

As a provider of Electronic Manufacturing Services (EMS), Esprit cannot provide blanket Conflict Mineral Compliance certificates, test reports, or conflict mineral content details beyond the information provided by the original component manufacturer.

Esprit will remain informed through its membership of the IPC, a global trade association serving the printed board and electronics assembly industries, their customers and suppliers along with updates from the ECIA.
