

# ESPRIT ELECTRONICS LIMITED

## QUALITY POLICY STATEMENT

Esprit provides a comprehensive range of Electronic Manufacturing Services (EMS) to UK and European markets, with a reputation for developing bespoke and flexible solutions.

- Investment in modern surface mount placement, selective soldering and automatic inspection capability
- Attentive Sales and Engineering Account support from Prototype to Volume Manufacture

Esprit ensures our customers benefit from our complete and comprehensive range of services and capabilities ranging from manufacturing and supply whilst offering effective design support services. Our strength is underpinned by our unique and innovative risk-based approach to supply chain management, logistics and manufacturing. We bring a refreshing approach to business with sustainable benefits.

- Effective financial planning and measured growth underpinned by sustained profitability
- Creative Supply Chain planning and procurement
- Added value through Project Management with innovative Logistics Management

Esprit has a committed and effective Leadership Team that maintains and promotes BS EN ISO 9001:2015, Customer requirements, Risk and Opportunities throughout our organisation.

The Quality Policy, Manual and Procedures specify the systems and processes employed to successfully operate the Business, allowing demonstration to our customers of Esprit Electronics' competence and commitment.

As such this policy, our key performance indicators, statutory and regulatory requirements will be regularly reviewed as part of our planned Management Review Process ensuring business and operational objectives remain relevant and appropriate.

This culminates in improved On Time Product delivery and reduced Product non-conformity
